

Rewarding Trust.

Growing the SB-ITM Community.

A referral model designed to recognise personal recommendations, reward long-term loyalty and encourage satisfied users to introduce SB-ITM to trusted contacts.

20% PERMANENT REFERRED-USER DISCOUNT	5% PER ACTIVE PAYING REFERRAL	50% MAXIMUM TOTAL DISCOUNT
--	---	--------------------------------------

THE CONCEPT

How the SB-ITM Referral Program benefits you

01	Start with confidence The user is introduced to SB-ITM through a personal recommendation from an existing member of the community. Every new user then begins with an initial free testing period of up to three months, allowing sufficient time to discover the system, become familiar with the Managed VPS environment and evaluate the service before activating a paid subscription.
02	20% permanent advantage Once the referred user moves from test mode to an active paid subscription, a 20% discount is applied and retained for as long as that subscription remains active.
03	Up to 30% additional referral reward The user may become a referrer. Each active paying referral generates an additional 5% discount, with a maximum of six referrals taken into account.

REFERRAL PROGRAM

ILLUSTRATIVE EXAMPLES

User profile	Active referrals	Referral reward	Total discount*
Direct subscriber	0	0%	0%
Referred user	0	0%	20%
Referred user + referrer	3	15%	35%
Referred user + referrer	6	30%	50%
Referred user + referrer	10	30% capped	50%

*The 20% component applies only to users who originally joined SB-ITM through an eligible referral.

Eligibility & activation

- A referral becomes eligible only when the referred user activates and pays for an SB-ITM subscription (Dedicated Managed VPS).
- The 20% referred-user discount has no time limit, provided the user's own paid subscription remains active.

Ongoing recalculation

- Only active, paying referred users count towards the referrer's monthly reward.
- If a referral cancels or stops paying, that referral is removed from the active count.
- Users with more than six active referrals retain the 30% cap until their active count falls below six.

WHY IT WORKS

The programme rewards trusted recommendations and long-term subscribers.

Referred users benefit from a long-term discount, while active referrers can progressively increase their savings by introducing new paying subscribers.

TRUSTED RECOMMENDATIONS • LASTING VALUE • SUSTAINABLE GROWTH
