

VPS First-Start Guide

CRUCIAL STEPS

1st use of the VPS – Tasks to perform

The initial VPS setup is organized into three simple steps:

1. Control Center Discovery, Prerequisites & Initial Setup

Discover the Control Center and configure the trading environment and the main bot parameters.

2. Start & Check

Start the ecosystem and confirm that the correct IBKR account is connected and that all open positions are properly detected.

3. Trading Day Workflow (manual launch for the first start)

Run the daily trading sequence: Watchdog Bot, Morning Decision Chain*, Entry Bot, Price Monitor Bot, and Status Dashboard.

Support

Generate the support ZIP file if support is required.

* The Morning Decision Chain automatically launches the Historical Data Warm-up, Regime Bot, Scan Bot, Decision Layer, and Bridge Bot.

1st use of the VPS – Tasks to perform

Initial Setup

Task No	Control Center Menu	Description	Type
1	Parameters / Environment	Select the LIVE or PAPER trading environment and configure the IBKR account credentials.	Mandatory
2	Parameters / Risk	Review or configure the Take Profit, Stop Loss, and trailing stop parameters.	Mandatory
3	Parameters / Bridge	Review or configure the candidate-selection threshold, number of symbols, and trading-day settings.	Mandatory
4	Parameters / Entry	Review or configure the execution schedule, allocation parameters, and selected symbols.	Mandatory
5	Parameters / OpenAI API Key	Configure an OpenAI API key if the optional AI PDF Report is required.	Optional

Prerequisites: The user must have valid IBKR LIVE and PAPER accounts, active market data subscriptions, and Market Data API access enabled through the IBKR Client Portal. Dedicated instructions are available in the Documentation Center.

*Always wait until the current bot or process has completed before launching the next one.
A dedicated section is provided for each Control Center function.*

1st use of the VPS – Tasks to perform

Start & Check

Task No	Shortcut Name	Description	Type
1	Watchdog Bot	Once the initial setup is complete, launch the Watchdog Bot to start the ecosystem. It starts and continuously monitors IB Gateway and the Risk Bot.	Mandatory
2	Cash Bot	This bot displays the connected IBKR account, account value, available cash, unrealized PnL, and realized PnL.	Recommended
3	Snapshot Bot	This bot generates a PDF portfolio snapshot showing the current open positions and their protection status.	Recommended

*Always wait until the bot or script has completed its job before launching the next one.
A dedicated section is available for each bot.*

1st use of the VPS – Tasks to perform

Trading Day Workflow

Task No	Shortcut Name	Description	Type
1	Watchdog Bot	Starts and continuously monitors IB Gateway and the Risk Bot. Keep it running throughout the trading session.	Mandatory
2	Morning Decision Chain	Runs the complete pre-market decision workflow: Historical Data Warm-up, Regime Bot, Scan Bot, Decision Layer, and Bridge Bot.	Mandatory
3	Entry Bot	Manages the entry of new positions at the configured execution time, subject to available cash, allocation rules, and entry parameters. Do not close it once launched.	Mandatory
4	Price Monitor Bot	Opens the browser-based intraday monitor and displays the current open positions. The Relative View — Base 100 is recommended for comparison with SPY and QQQ.	Recommended
5	Status Dashboard	Generates and opens a consolidated operational dashboard showing the environment, market regime, selected symbols, bot statuses, account information, and open positions.	Recommended

Always wait until the bot or script has completed its job before launching the next one.

A dedicated section is available for each bot.

Separate documentation is available for scheduled-task configuration and automated execution.

The screenshot displays a terminal window titled "C:\IBKR\BOT\system_c\src\C_I" with multiple tabs. The main log output shows system information, runtime context, IBKR connection details, risk configuration, startup status, and a portfolio recovery summary. Three orange callout boxes with arrows point to specific sections:

- Connected IBKR Account and Environment**: Points to the "IBKR CONNECTION" section.
- Configured Risk Parameters**: Points to the "RISK CONFIGURATION" section.
- Detected Open Positions**: Points to the "PORTFOLIO RECOVERY" table.

4. Bridge Bot Selected Candidates

BAP — CREDICORP LTD | Support Rebound

SB-ITM SCORE	PROFILE	RSI	ATR %	SUPPORT DIST.	RESISTANCE DIST.
28	Support Rebound	45.07	4.3%	1.88%	10.89%

Structure Analysis

The MA200 slope is upward, and BAP has been above the MA200 for 61 weeks, indicating a strong long-term trend.

Technical Position

Support proximity remains favorable at 1.88%, while resistance distance remains available at 10.89%.

Momentum / Volatility

The RSI is 45.07, and ATR% is 4.3, reflecting moderate momentum with moderate volatility.

Strengths

- Volume condition confirmed
- Technical rebound pattern detected
- Liquidity remains favorable

Points of Attention

- High volatility condition flagged

Neutral SB-ITM Reading

CREDICORP LTD (BAP) stands out for its confirmed volume and detected rebound pattern, while moderate momentum reflects a cautious stance.

SB-ITM

In case of issues:

- Confirm that the correct IBKR environment is selected: LIVE or PAPER.
- Confirm that the IBKR account ID and credentials are correct.
- Check that IB Gateway is connected.
- Close the affected bot and relaunch it from the Control Center.
- If the issue persists, generate the Support ZIP file.

SB-ITM Support:

- Technical support available via Fiverr or by email
- Documentation Center available on the SB-ITM website
- Onboarding assistance (optional)

Support Channels:

<https://www.fiverr.com/onoff0007>

<https://www.youtube.com/@SB-ITM>

Before contacting SB-ITM Support, generate the Support ZIP file and send it to support@sb-itm.eu.

This system is designed for autonomous operation once correctly configured and deployed.

Thank You
